Re: Crop Pest Management School  
January 2 through 4

Will,

It is my understanding that you have funding available to help with conference fees in connection with the Crop Pest Management School. I would like to apply for your scholarship funding to attend this training.

The following topics will help me meet the needs of my community here on the Flathead Indian Reservation: Biofuel decision making, irrigating with limited water supplies, manure management, and insect/plant disease detection and management. During my September producer meeting I had requests to provide information on many of these topics and this training will help me fulfill those requests.

Thank you,

T. Rene Kittle  
Extension Agent
